NuWaves Engineering's Sieng earns instructor certification for IPC-A-610 "Acceptability of Electronic Assemblies"

West Chester, Ohio, Feb 25 — Sakada Sieng has successfully completed the instructor certification training for IPC-A-610. This is the electronic industry's most widely recognized standard used for acceptance criteria of high reliability circuit board assemblies. Sieng is a key technician for NuWaves Engineering and is involved in both military and commercial projects. "Sakada's certification demonstrates NuWaves' commitment to quality assurance initiatives and customer satisfaction" says Jeff Wells, president of NuWaves.

NuWaves Engineering is an RF and wireless engineering development company which provides state-of-the-art design services to several markets. NuWaves creates turnkey custom designs that go from conceptual idea to production.
