

NuWaves Receives Contract Award from Navy under Seaport-e Program

Middletown, Ohio, June 2, 2008 – NuWaves Engineering has been awarded an “Indefinite Quantity Indefinite Delivery (IDIQ)” contract from the [Naval Sea Systems Command](#) (NAVSEA) which covers a five year period.

NAVSEA and its Warfare Centers are responsible for the acquisition of all US Navy ship and shipboard systems. NuWaves Engineering has been selected to participate in the Seaport Program in the functional areas of:

- Research and Development Support
- Engineering Support
- Modeling
- Prototyping
- Systems and Technical Data
- Quality Assurance Support
- Measurement Facilities / Ranges
- Program Support
- In-Service Engineering

An Indefinite-Delivery, Indefinite Quantity (IDIQ) contract is a type of contract that provides for an indefinite quantity of supplies or services during a fixed period of time. The Government places delivery orders (for supplies) or task orders (for services) against a basic contract for individual requirements.

NuWaves Engineering is a premier supplier of RF Systems, Subsystems, Products, and Engineering Services designed to customer requirements. NuWaves is a RF power house, with the singular mission of delivering unsurpassed RF Design Engineering Services. NuWaves offers a wide range of engineering services to fit most RF applications.
